Adapting Motor Vehicles For People With Disabilities

Guide to assist persons with disabilities who want to purchase or modify a vehicle with adaptive equipment. The brochure provides a step-by-step process to help consumers evaluate their needs, select the right vehicle and choose a qualified dealer to modify their vehicle. It also includes general information on cost savings, licensing requirements and organizations to contact for help.

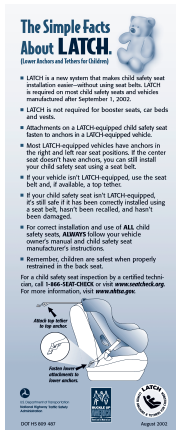

Buying A Safer Car For Child Passengers

This brochure assists consumers with children in making vehicle purchase decisions and provides them with information to help them assess the safety and family-friendly features of vehicles. It provides a vehicle safety checklist, identifies current model year vehicles that have manual air bag on/off switches, built-in child seats, rear center lap/shoulder belts and adjustable upper belts (rear).

Antilock Brake Systems (ABS)

This brochure will educate consumers about the safety benefits of this safety technology and to answer general questions on the proper use of anti-lock brakes. It defines ABS, and how to determine whether your vehicle has ABS.

Simple Facts About LATCH

This flyer describes the LATCH system, which makes child safety seat installation easier, without using the vehicle safety belt system.

(The flyer is also translated into Spanish).
